Subject: Letter of recommendation

Dear Sir or Madam,

It was my pleasure to supervise the gap-year internship that Guillaume Guguen carried out between the fourth and fifth years of his engineering studies at the Institut National des Sciences Appliquées (INSA) in Rennes, in the Mechanical and Automation Engineering programme. He completed his internship within the Special Optical Fibres division, in Lannion, over six months, working on the development and automation of a bench for the photo-inscription of fibre Bragg gratings (FBG).

Throughout his internship, Guillaume stood out for his creative and enterprising mind, as well as for a cordial and cooperative attitude that ensured an excellent integration into the team. His way of working, both dynamic and methodical, allowed him to tackle complex tasks effectively and to progress quickly in a field—photonics—that was not part of his curriculum.

Guillaume demonstrated a strong practical and technical sense, showing autonomy, perseverance and versatility. He addressed the problem entrusted to him with relevance and efficiency, proposing innovative and well-suited solutions. He drew on a range of skills (mechanics, automation, LabVIEW programming and electronics) to improve the performance and functionality of the photo-inscription bench and to develop a suitable maintenance tool.

In short, Guillaume was a very good intern, and I am convinced that he will put his skills, creativity and professionalism to good use in his future academic and professional endeavours.

I highly recommend Guillaume and remain available for any further information. Please accept the expression of my sincere regards.

Kind regards,

Laurent Lablonde
