Subject: Letter of recommendation

To whom it may concern,

I am pleased to recommend Mr. Guillaume Guguen, a final-year student in Mechanical and Automation Engineering at INSA Rennes, who worked with Neutron IT during the first half of 2026, as part of a four-month assignment run through the Junior Enterprise Ouest INSA.

We entrusted him with building, as an internal proof of concept, a 3D-printed drone controlled by an onboard artificial intelligence. Guillaume led this project from end to end: design, component selection, assembly, and then a campaign of flight tests in real-world conditions. The drone is now fully functional and all the tests were carried out successfully.

Throughout the assignment, Guillaume showed genuine autonomy and great professionalism. Proactive and full of ideas, he was able to steer the technical decisions wisely while maintaining clear and regular communication at every stage of the project. The documentation he produced is, moreover, impeccable, in both its rigour and its precision.

For all these reasons, I recommend Guillaume Guguen without reservation. I am convinced that he will bring the same high standards and the same commitment to any team or organisation that places its trust in him. I remain available for any further information.

Please accept, Dear Sir or Madam, the expression of my highest regards.

Romain Gasquet

Chief Executive Officer, Neutron IT
